Software engineer with 2 years of full-stack experience building public health data platforms serving 100,000+ users. Ships features end-to-end across React/Next.js, Node.js, Flask, and PostgreSQL, with production experience at Deloitte and Salesforce (Slack). Owns technical decisions from architecture through CI/CD and deployment.

EXPERIENCE

Deloitte | Software Engineer Atlanta, GA | Jun 2024 - Present

- Built and maintain interactive data visualization profiles (React, D3plus) for a public health reporting platform serving 100,000+ users, including custom bar chart rendering and Section 508-compliant PDF/print export.
- Architected a unified portal (Next.js, TypeScript, Drizzle ORM) consolidating two standalone applications into a single multi-app routing structure; selected Drizzle over Prisma for lighter bundles and SQL-level control in a read-heavy environment.
- Built a catalog search system for CDC lab researchers featuring search, pagination, grid/table views, out-of-stock indicators, and PDF/Excel export of microbial and genomic data; locked down authenticated endpoints with route protection and unit tests.
- Designed and launched 4 ETL pipelines (Databricks, PySpark) ingesting 10,000+ records per batch, eliminating manual data handling.
- Set up CI/CD pipelines with GitHub Actions (linting, typecheck, testing, builds) and managed build-and-deploy workflows across multiple applications.
- Maintained 3 PostgreSQL database schemas and resolved critical CMS backend issues, cutting content publishing delays from hours to minutes.
- Drove team-wide adoption of shared linting rules, PR templates, and branch protection policies; regular code reviewer across the team.
- Earned "Exceptional" client rating and promotion in first full performance year.

Morehouse College x McKinsey & Company | Software Engineering Intern Atlanta, GA | Feb 2024 - May 2024

- Built an SQL query optimization tool powered by OpenAI's LLMs, rewriting inefficient queries submitted by analysts.
- Developed the full stack: React frontend and Flask backend exposing RESTful APIs.

Salesforce (Slack) | Software Engineering Intern San Francisco, CA | May 2023 - Aug 2023

- Implemented Out of Office profile fields in Hacklang within Slack's production codebase.
- Hardened the Out of Office feature with new unit and integration test coverage.
- Redesigned the profile flex pane in React to simplify the layout and reduce visual noise.
- Resolved a high-priority customer escalation by differentiating profile banners for specific user groups.

Salesforce (Slack) | Software Engineering Intern Atlanta, GA | Sep 2022 - Dec 2022

- Developed and deployed a custom Slackbot (Python, Slack API, Block Kit) that surfaced team information directly in Slack channels, replacing manual lookups.

IBM | Technical Intern Remote | Jun 2021 - Aug 2022

- Built a React component enabling data export for 3,000+ employees.
- Engineered a Python script to analyze and compare Excel sheets with 100,000+ rows.

EDUCATION

Georgia Tech (Online) | M.S. Computer Science, Machine Learning specialization Incoming, Fall 2026

Morehouse College | B.S. Computer Science, Minor in Mathematics Aug 2020 - May 2024

GPA: 3.73 | Magna Cum Laude | Phi Beta Kappa

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C#, Java

Frontend: React, Next.js, D3/D3plus, HTML/CSS

Backend: Node.js, Express, Flask, Drizzle ORM, PostgreSQL, MySQL

Tools: Git, GitHub Actions (CI/CD), Docker, Databricks, PySpark, Agile/Scrum
